

# Who is the best person to design the indigent healthcare software you use?

## We believe you are.

Indigent Healthcare Solutions (IHS) is the fastest-growing provider of Windows-based software designed exclusively for Texas indigent healthcare departments. An average of two Texas indigent healthcare departments each month are choosing to leave their current software providers in favor of IHS' superior product and support.

We believe they are making the switch because IHS listens. We want to know what you want from the software you use every day.

Several times a year IHS brings our customers together to ask them how our software and support can be made better. In the most recent IHS advisory committee meeting in Houston, representatives from county indigent healthcare departments and public hospitals proposed a number of ideas which are already being implemented in our latest software release.

**You design.**

**We provide ongoing support.**

Our role doesn't end when the software is licensed. After installing an IHS system, we provide continuing support to make sure everything works the way you need it to. Our personalized training and service provides an ongoing support network that allows an easy transition to a new, automated environment.

**We are ready to support you now.**

To learn more about the many ways that we can apply our experience and talents to help you overcome a problem or take advantage of an opportunity, please contact us. You can also visit our website at [www.indigenthealthcaresolutions.com](http://www.indigenthealthcaresolutions.com).

IHS advisory committees, composed of representatives from county indigent healthcare departments, decide which features will be implemented in each software release.

A Windows®-based software solution developed exclusively for Texas indigent healthcare departments and hospital districts from a company known for world-class support
